Certifications:

AWS Certified Solutions Architect Associate.
ITIL 2011 Foundations (ITSM)

Professional Experience:

Senior Lead Software Engineer | Virtusa Consulting Services LTD

March 2022 – PRESENT

Client: JP Morgan Chase Bank

- Working on consumer banking (CCB) as part of JP Morgan's India Production Management (IPM) Team.
- Leading a team of 7 folks in providing comprehensive Production support for various JPMC's Products/Application, ensuring high availability, scalability, and performance with DevOps Practices.
- Managing/Supporting applications/Infra/resources/services on AWS Cloud (EKS Cluster) as well as On-Premise environment, implementing proactive alerting systems and establishing efficient deployment pipelines to enhance deployment efficiency and productivity.
- Utilizing GitHub for efficient source code management, ensuring version control and collaboration among team members.
- We use Jenkins CI/CD pipelines for seamless deployment/change/release process, these changes are like infra, server configuration, application version upgradation, patch updates etc.
- Performing Linux commands for BAU activities on production servers, including backups in S3 Bucket, restarting Tomcat servers, and managing other services, ensuring smooth operations and minimizing disruptions.
- Configured Grafana and Splunk dashboards for application health monitoring, enabling real-time visibility into system performance.
- Managing incident responses, troubleshoot issues, and implement solutions to minimize downtime and ensure seamless operations. We use Service-Now to track Incident, Change/release Task/activity.
- Using Control-M & Autosys for Monitoring various batch Jobs & creating alerts for the same.
- Using JIRA for issue tracking and monitoring, ensuring efficient collaboration and timely resolution of tasks.
- Collaborating closely with development teams and product owners to drive stability and system improvement initiatives, resulting in enhanced business productivity.
- Engaged in daily meetings with US business leads to discuss ongoing issues, challenges, and strategies for the production environment, fostering effective communication and problem-solving.
- Conducting thorough assessments of incident, problem, change, and release management processes, ensuring adherence to SLAs and the ITIL framework for efficient service delivery.

Client: Qantas Airways

- Managed enterprise-scale solutions on AWS, leveraging resources such as EC2/AMI, S3, ASG, and LB, with an Infrastructure as a Code (IaC) approach and DevOps Practices.
- Tested and validated provisioned resources in the staging area using CI/CD operations, ensuring the quality and functionality of the infrastructure.
- Utilized GitHub for efficient source code management, ensuring version control and collaboration among team members.
- Deployed hot fixes, patches, and war files through Bamboo CI/CD Pipeline, delivered by the development team, on staging and production environments, minimizing downtime and ensuring smooth application updates.
- Utilized Ansible and Terraform for provisioning resources on AWS in the test environment, streamlining the deployment process and ensuring consistency.
- Implemented Docker in the test environment, enhancing the efficiency and portability of applications.
- Monitored application and infrastructure services using Data Dog, proactively identifying and resolving issues to maintain optimal performance.
- Analyzed logs using Splunk for troubleshooting and analysis purposes, identifying patterns and trends to improve system performance and reliability.
- Handled application production and operations support, interacting with business users to address any issues they encountered, providing timely and effective solutions.
- Managed team and client relationships in a lead role capacity, fostering collaboration and ensuring client satisfaction.
- Maintained and updated technical documents and procedures on Confluence, ensuring accurate and up-to-date documentation for reference and knowledge sharing.
- Provided regular and customized training to teams within the business, enhancing their skills and knowledge in relevant areas.
- Developed reports for performance optimization across the business, identifying areas for improvement and implementing strategies to enhance efficiency.
- Managed incident, problem, change, and release management assessments, ensuring adherence to ITIL framework and best practices.
- Ensured SLA management, meeting or exceeding service level agreements to maintain high-quality service delivery.
- Demonstrated a good understanding of the ITIL framework, applying its principles and practices to effectively manage IT services.

Incident Management Analyst | NCR Corporation India PVT LTD

MAY 2013 – APR 2015

Client: PNB Bank

- Conducted incident management assessments, ensuring timely resolution of issues and minimizing system downtime.
- Implemented effective change management processes, ensuring smooth transitions and minimizing disruptions to production systems.
- Monitored, managed, and implemented services and batch jobs on production servers, ensuring optimal performance and adherence to SLAs.
- Responded promptly to user service requests, resolving trouble tickets efficiently to maximize system uptime.
